

# André Nicolas Silva

Product Engineer | Software, UX, AI, and Ownership  
Maceió, Brazil | devandrenicolas@gmail.com | Portfolio | LinkedIn | GitHub

## Summary

---

Product Engineer who turns user context, requirements, and business rules into delivered software. Combines frontend engineering, full-stack contributions, UX, architecture, testing, and generative AI to make decisions within scope, trust, and user value.

## Experience

---

### MSPA — Frontend Engineer (product and full-stack contributions) Apr. 2025–Present

- Evolve Compass, Trust Center, and compliance surfaces used by 10+ companies, connecting product context, requirements, and business rules to technical definition, implementation, delivery, and support.
- Turn complex privacy and compliance flows into interfaces with Angular, React, TypeScript, Web Components, and Lit, balancing user clarity, technical constraints, and maintainability.
- Contributed to a framework-agnostic consent flow integrated with Cloudflare Workers, KV, D1, and Durable Objects; the solution combines managed configuration, UI, and audit events.
- Integrate user-facing generative-AI capabilities with Genkit, contextual input, sanitization, and structured responses, treating consistency and safety as part of the product flow.
- Reorganized an engineering workflow in a critical phase, directly coordinating four people in a six-person team to improve scope clarity and delivery continuity.

## Skills

---

**Product:** context discovery, requirements, business rules, UX, scope, trade-offs, ownership, and technical definition.

**Engineering:** TypeScript, Angular, React, Next.js, Go, REST APIs, SQL/PostgreSQL, Cloudflare, testing, and CI/CD.

**AI:** Genkit, contextual prompting, input sanitization, and structured responses.

## Selected Projects

---

### FechaRacha — Strategy, trust, and access rules Next.js, React, Supabase, Prisma, Zod

Modeled a Brazilian WhatsApp-and-Pix coordination experience with shared links, activation hypotheses, and privacy safeguards. Implemented tested authorization safeguards, expiring/limited tokens, audit events, and PII minimization.

### Terto Beats — Digital-commerce journey Next.js, TypeScript, Supabase, Stripe, Mercado Pago

Implemented an order and checkout flow that validates provider, currency, and amount, starts payments, and processes webhooks through shared fulfillment; no revenue or volume is presented without evidence.

## Open Source

---

### Stoat / Revolt Platforms LTD — Volunteer Frontend Engineer 2026–Present

File-size validation-error fix merged into the official web client by maintainers.

## Education

---

### Tecnólogo in Internet Systems — UNCISAL (Brazil) Completed 2026

Brazilian higher-education technology degree.
