

André Nicolas Silva

React Developer | TypeScript, Next.js, and Web Products

Maceió, Brazil | devandrenicolas@gmail.com | Portfolio | LinkedIn | GitHub

Summary

React Developer focused on web products and user journeys. Combines React, Next.js, and TypeScript with authentication, data, testing, and delivery to turn business rules into clear, secure, and reusable flows.

Experience

MSPA — Frontend Engineer (product and full-stack contributions)

Apr. 2025–Present

- Evolve Compass, Trust Center, and compliance surfaces used by 10+ companies, taking requirements and business rules through implementation, debugging, delivery, and production support.
- Build interfaces with React, Angular, TypeScript, Astro, and reusable components; select approaches based on product context and user-journey clarity.
- Contribute to integrations spanning Go APIs, SQL/PostgreSQL, asynchronous processing, and Cloudflare infrastructure when a feature requires work beyond the frontend.
- Integrate user-facing generative-AI capabilities with Genkit, contextual input, sanitization, and structured responses to keep interactions consistent.
- Work with Vitest, code review, CI/CD, accessibility, SEO, and performance to investigate issues and sustain delivery quality.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Angular, and Astro.

Product and quality: UX, requirements, business rules, accessibility, SEO, performance, Vitest, automated testing, Git, code review, and CI/CD.

Data and integrations: Supabase, PostgreSQL, Prisma, Zod, REST APIs, authentication, webhooks, and Cloudflare.

Selected Projects

FechaRacha — Collaborative goals and invitations

Next.js, React, Supabase, Prisma, Resend, Zod

Built group-goal, authentication, invitation, and declared-contribution flows. Behavioral tests verify query-boundary authorization, membership-aware visibility, notification deduplication, and state transitions.

Terto Beats — Digital-commerce flow

Next.js, TypeScript, Supabase, Stripe, Mercado Pago

Implemented the interface, orders, checkout, persistence, and post-purchase automation; orchestration validates provider, currency, and amount, while webhooks process payment events and fulfillment.

Open Source

Stoat / Revolt Platforms LTD — Volunteer Frontend Engineer

2026–Present

File-size validation-error fix merged into the official web client by maintainers.

Education

Tecnólogo in Internet Systems — UNCISAL (Brazil)

Completed 2026

Brazilian higher-education technology degree.
