

# ANDRÉ NICOLAS SILVA

Frontend Engineer | TypeScript, React, Angular | Architecture & Performance

Brazil ▪ [devandrenicolas@gmail.com](mailto:devandrenicolas@gmail.com)  
Portfolio ▪ [GitHub](#) ▪ [LinkedIn](#)

## PROFESSIONAL SUMMARY

Frontend Engineer with experience building and evolving SaaS products used by **10+ companies**, with a focus on **TypeScript, frontend architecture, performance, UX, and product development**.

Professional experience primarily focused on frontend engineering, building complex applications with **Angular, React, and Web Components**, while contributing to architectural decisions and broader system evolution. Hands-on experience beyond the UI layer, contributing to **Golang, hexagonal architecture, event-driven systems, Server-Sent Events (SSE), databases, migrations, CI/CD, and production deployments**.

Combines strong frontend engineering skills with the ability to work across the stack, connecting technical decisions with product and user needs.

## TECHNICAL SKILLS

|                        |                                                                                                             |
|------------------------|-------------------------------------------------------------------------------------------------------------|
| Frontend               | TypeScript, React, Angular, Signals, RxJS, Web Components, Lit, Shadow DOM, Tailwind CSS                    |
| Backend                | Golang, APIs, concurrency, event-driven systems, Server-Sent Events (SSE)                                   |
| Architecture           | Hexagonal Architecture, Design Systems, Clean Code, Component-Based Architecture, Frontend Architecture     |
| Cloud & Infrastructure | Cloudflare Workers, KV, D1, Durable Objects, Serverless, CI/CD, production deployments                      |
| Data & Quality         | Databases, migrations, Vitest, automated testing, debugging, code review                                    |
| Product                | Product Thinking, UX, SEO, web performance, scope definition, backlog management, stakeholder collaboration |

## PROFESSIONAL EXPERIENCE

### MSPA — Frontend Engineer (Product Focus)

Apr 2025 – Present

*SaaS platform for Privacy, Compliance, and Digital Auditing*

- **Product Development:** Build and evolve core SaaS products, including **Compass and Trust Center**, used by **10+ companies**, with a primary focus on frontend engineering and product development.
- **Frontend Architecture:** Develop applications with **Angular and TypeScript**, using Signals/RxJS and architectural patterns focused on reusability, maintainability, and long-term product evolution.
- **Web Components & Edge:** Developed an agnostic consent engine using **Web Components, Lit, and Shadow DOM**, integrated with Cloudflare's edge infrastructure.
- **Performance & SEO:** Implement performance and SEO improvements across web applications, achieving high Lighthouse scores while prioritizing loading performance, usability, and user experience.
- **Full-Stack Engineering:** Develop features and solve problems beyond the frontend layer, contributing to **Golang, APIs, concurrency, event-driven systems, and Server-Sent Events (SSE)**.
- **Architecture & Systems:** Contribute to architectural decisions and implement solutions using **hexagonal architecture** and clear separation of responsibilities.
- **Data & Infrastructure:** Work with **databases, migrations, CI/CD, and production deployments**, following changes from implementation through delivery.
- **Engineering Process:** Reorganized the development workflow during a critical project phase, improving scope clarity, sprint organization, and team productivity across a **6-person engineering team**, with direct coordination of 4 team members.

## OPEN SOURCE CONTRIBUTIONS

### Stoat / Revolt Platforms LTD — Volunteer Frontend Engineer

2026 – Present

Contribute to the open-source project with a focus on **UX engineering and frontend development**, identifying UX issues and turning them into technical improvements that make the product clearer and more intuitive for users. **Pull request approved by project maintainers**.

## PROJECTS

### Terto Beats — Digital Platform

*Next.js, TypeScript, Supabase, Vercel*

Built and evolved a personal digital platform for selling digital products, implementing checkout flows, state management, data persistence, and post-purchase automations.

### RendeCerto — Financial Web Application

*Next.js, TypeScript, Vitest*

Built a financial simulation and calculation application, implementing business rules and calculation scenarios with a focus on accuracy and reliability. Added automated test coverage to validate results across different scenarios.

### Quebrando Fronteiras — Social Platform

*Next.js, TypeScript*

Refactored critical user flows in a social platform, improving the user experience and contributing to increased conversion.

## EDUCATION

### Internet Systems — UNCISAL

2024 – 2026

## LANGUAGES

Portuguese: Native ▪ **English:** Intermediate/Advanced (actively improving)
